REQUISITION SPECIFICATION

PROJECT DESCRIPTION: Provision of internet access failover solution for Centane and Willowvale Campus

SCOPE OF WORK:

The two Campuses are connected via the High Tower named VC Nkanga. This High Tower is challenged by the vandalization of the backup power units that are continuously installed and stolen from that site. This leaves the two Campuses under a challenge of no internet access when the generator kicks in during the loadshedding.

The institution currently has a primary internet connection 200mbps from SABEN that comes through fixed wireless and this connection is greatly affected by load shedding. We are now looking for redundancy internet connection for a 3year duration in which service provider is expected to Supply, install, configure and maintain the service. Our redundancy internet connection or failover should be or aggregated to 50mbps download with a minimum upload of 10mbps utilizing Very Small Aperture Terminal.
